

FUEL PUMP ASSEMBLIES

Walbro Fuel Pump Assemblies are designed to fit the needs of our customer's various fuel tank configurations while meeting the required fuel flow, pressure, and packaging requirements.

Our pump assemblies include a design-specific flange that mounts directly into the fuel tank and offers various design options.

Suitable applications include ATV's, snowmobiles, personal watercraft, lawn and garden tractors and motorcycle/scooters.

Features:

- Level sensors calibrated to specific fuel tank configurations
- Inlet filters with capacity and micron rating options
- Pressure regulators with set-point options
- Return or returnless systems
- Fuel pump output and current draw options
- Low permeation flange and seal material options
